

HALLOWEEN CANDY BOWL

SUPPLIES NEEDED

- 1 piece of Fiberform (18"x22")
- ½ yard fabric (either all one color or one for the inside of the bowl and one for the outside of the bowl)
- HRFive Fabric Adhesive Spray
- OESD Design Pack 12016 Halloween Silhouettes
- Pattern piece (on page 2)

INSTRUCTIONS

1. Trace pattern onto Fiberform to make 6 pieces. (Use a ball point pen or pencil.) Carefully cut out pieces.
2. Rough cut (adding approximately ½" seam allowance on all edges) 12 pieces of fabric for bowl sides and lining.
3. Sew designs on the widest part of 6 of the pieces of fabric.
4. Adhere one of the pieces of Fiberform to the center of the wrong side of each of the unsewn pieces of fabric with HRFive.
5. Place the fabric pieces (one sewn and one unsewn) right sides together and edge stitch very close to the edge of the Fiberform leaving an opening about 3" long to turn. Trim close to the edge of the Fiberform except for the opening. Leave a seam allowance on the opening.
6. Turn right side out. Don't worry about scrunching up the Fiberform, you'll steam it out later.
7. Press each piece making sure to press the opening to the inside.
8. Put two finished pieces together with right sides facing each other. Edge stitch one side. Add another piece to the two piece unit by placing the right sides together and edge stitching. Repeat this so that you have two parts that have 3 pieces each. Edge stitch one side of each together. Edge stitch the final side.
9. Turn right side out and steam if needed.
